## HII-W (High Iron) 4 fl. oz.

Manufacturer: Pure Herbs, LTD.

Below is about historical observations and historical data relating to herbs. This document is not intended to be a substitute for medical advice by license physicians. All readers should consult a physician regularly in all matters related to medical problems. This includes the diagnoses and treatment of disease and all other physical and mental conditions.

HII-W(High Iron) - It is the most beautiful of iron formulas and it tastes good. It is upsetting to see other sources of iron on the market that proclaim how "excellent" they are and their taste is downright disgusting, something like licking a rusty tin can. And, they are about as good as they taste for your body. That is because they use an iron source, just about like rust, mixed with sulfur. You can be assured, when iron is organized by a living green plant, it has a far greater attraction for your body cells than rust from the ground. But then, the rust and sulfur form is cheap and after a while it may severely constipate you and destroy the Vitamin E in your system, as well as clog up liver functions. This is especially detrimental to pregnant women as they may become sick and the baby born nearsighted. The proof that vegetable iron is good for you is, after a short time of taking it you will probably feel a lot better, men included. With the iron ore type of iron, after a while you will probably feel pretty terrible. Iron is constantly needed to manufacture new red blood cells, especially in women. When the right kind of iron enters your body, in a liquid extract form, you can readily absorb it. As it hits the oxygen in the body, you feel the spark of life tickling your whole system again. It is alright to banish constant fatigue and feel frisky and stay that way. Breathe and enjoy it.\* COMBINATION:Thyme, Yellow Dock, Red Raspberry Leaf, Indian Tobacco. DOSE:20 to 40 drops per day. If deficient or time of menstruation, 40 drops, 3 times per day. For babies and small children, 1 - 5 drops per day. Can be rubbed into soles of feet. For older children, 5 - 10 drops per day. Adolescents use same amount as adults, as they are growing and need more of everything, even though they have not yet reached their full growth.\*This product has not been evaluated by the Food and Drug Administration.
