CA-W (Calcium) 4 fl. oz.

Manufacturer: Pure Herbs, LTD.

Below is about historical observations and historical data relating to herbs. This document is not intended to be a substitute for medical advice by license physicians. All readers should consult a physician regularly in all matters related to medical problems. This includes the diagnoses and treatment of disease and all other physical and mental conditions.

CA.-W(Calcium) - Calcium, is the vital link in the chain of nutrients required for a healthy body with calm nerves and strong bones. Without it a person may experience "cold sweats", teeth that hurt, pounding or irregular heart beat, ringing in the ears, muscle cramps, bones that become like lace (porous) and crumble. Press the tip of the breast bone at the bottom where the ribs come together and see if it hurts. If so, you can be assured you lack Calcium. The more sensitive, the greater the problem. Do not despair. Nature has provided the rescuer. Bones were not meant to become weaker with age. Every year an animal lives in the wild, eating its normal diet, its bones become stronger. Did you ever see a cow or a deer with arthritis? Cows and deer have incredibly strong bones to support great weight or take the pounding of swift flight from danger or the sheer pleasure of freedom that comes to those that can tirelessly run like the wind. Calcium, for them, comes from plants. Now you can have that calcium too - without having to chew all day to get it. Horsetail and Oat Straw are included in this combination for the unusual properties of containing an element named Silicon rather than Calcium. It is not supposed to be possible, according to scientists, to change one element to another without a thermonuclear explosion, but some body types can, apparently, change one element into another, as in the case of changing Silicon into Calcium. Experiments run with chickens, where all the dietary intake of Calcium was carefully monitored and measured, even the Calcium in their drinking water, showed increased eggshell production and increased bone density when Silicon was added to their diet. They did not get enough Calcium to do that. That is not possible, but then the chickens did not know that. Perhaps there was something about a goose that laid a golden egg. At any rate, some people who have difficulty assimilating enough Calcium to repair a broken leg, do get the that broken leg fixed with Calcium filling in the break by taking an herbal Silicon source. CA.-W provides dietary calcium and Silicon from active vegetables sources.* COMBINATION:Dulse, Horsetail, Indian Tobacco, Marshmallow, Mullein, Oat Straw, Red Raspberry Leaf. DOSE:20 to 40 drops, 3 times per day. In a broken bone or if severely deficient, then 80 drops, 3 times per day.*This product has not been evaluated by the Food and Drug Administration.
